

Function hall management App:

Platform Availability

- Mobile App (Android/iOS) – simple, intuitive design
- Admin Dashboard (Optional Web Version) – for deeper insights

Interactive Booking Calendar

- Instantly view availability for any date
- Color-coded status: Available, Enquiry, Booked
- Tap on a date to check existing bookings or add new ones

Quick Enquiry Capture

- Record client name, number, and notes
- Store interested leads without committing to bookings
- Easily convert to bookings when confirmed

Easy Event Booking with Payment Tracking

- Capture total event amount and advance payment
- Auto-calculate remaining balance
- Maintain full payment history and due reminders

Theme Selection with Visual Reference

- Choose from a gallery of pre-loaded decoration themes
- Attach reference pictures for easy execution

Temporary Customer Profiles

- Quickly save customer data during enquiries or bookings
- Profiles get auto-cleared when not needed

Client Booking Profile

- View full details of the event
- Track payments, theme, notes, and personal information

Role-Based Access (Admin + Team Users)

- Manage staff with different levels of access
- Only admins can add/edit users and view sensitive data

Details page by page:

● 1. Splash Screen

Purpose: Branding and initial loading.

- Shows app logo
 - Lasts for ~2 seconds
 - Navigates automatically to Login screen
-

🔒 2. Login / Authentication Page

Purpose: Authenticate users before accessing the system.

Fields:

- Phone number or Email
- OTP input or Password field
- "Login" button

Features:

- Validation for input
 - OTP verification or password check
 - Success → Navigate to Calendar/Home
 - Failure → Show error message
-

🏠 3. Home (Calendar View)

Purpose: Central dashboard showing availability/bookings by date.

Components:

- Monthly calendar view (date-wise)
 - Green: Available
 - Yellow: Enquiry
 - Red: Booked
 - Navigation arrows for month switching
 - Tap on any date to access the Date Detail Modal
-

4. Date Detail Modal

Purpose: Manage what happens on a specific date.

Based on status of the date:

✅ If Available:

- Button:  Create Booking
- Button:  Add Enquiry

● If Enquiry exists:

- List of enquiries for that date
- Tap to view Enquiry Details
- Option to convert enquiry to booking

● If Booked:

- Show summary of booking
 - Tap to view full Booking Details
 - From there → tap on profile → view payment & decor info
-

5. Create Enquiry Page

Purpose: Quickly log interest for a specific date.

Fields:

- Name

- Phone number
- Notes
- Auto-filled Date from calendar

Actions:

- Submit → Saves to database
 - Updates calendar to show that date as "Enquiry"
-

6. Enquiry Details Page

Purpose: View and convert an enquiry.

Components:

- Name
 - Phone number
 - Notes
 - Created date
 - Button:  Convert to Booking → Opens booking page with pre-filled data
-

7. Create Booking Page

Purpose: Finalize event details and take advance.

Fields:

- Customer Name
- Phone Number
- Notes
- Event Date (pre-filled)
- Total Package Amount (number)
- Advance Paid (number)
- Balance (auto-calculated)

- Select Decoration Theme (from list)

Actions:

- Submit → Save booking
 - Calendar gets updated to "Booked"
 - A temp customer profile is created
-

8. Booking Details Page

Purpose: Complete view of booking info.

Sections:

- Customer Info
- Booking Date
- Total Package Amount
- Advance Paid
- Balance Left
- Booking Notes
- Status: (Paid / Pending / Cancelled)

Buttons:

-  View/Add Payment Details
 -  View Selected Decoration Theme
 -  Edit Booking
 -  Cancel Booking
-

9. Payment Management Page

Purpose: Track and add payments linked to a booking.

Fields:

- Payment Date

- Amount Paid
- Mode (Cash, UPI, Bank Transfer, etc.)
- Notes

Actions:

- Add payment
 - Edit previous payments
 - Mark booking as fully paid
-

10. Decoration Theme Gallery

Purpose: Choose a decoration style for a event.

Components:

- Grid/List of theme cards
 - Theme Name
 - Reference Image(s)
 - Description
- Selection button

Actions:

- Attach selected theme to booking
-

11. Temp Customer Profile

Purpose: Temporary store for customer data during booking.

Fields:

- Name
- Phone Number
- Notes

 Note:

- Created during enquiry or booking
 - Cleared if booking is not completed in X mins (or manually)
-

12. Settings / User Profile

Purpose: User account settings

Components:

- View/Edit personal info
 - Role: (Read-only unless admin)
 - Logout Button
 - Theme / App settings (optional)
-

13. Admin – User Management Module

Visible only for Admin users

Users List Page

Purpose: View/manage all registered users

Components:

- Table: Name, Phone/Email, Role, Status (Active/Inactive)
 - Filters: Role-based filtering
 - Search bar
 - Button:  Add New User
-

Add/Edit User Page

Purpose: Onboard or update users

Fields:

- Name

- Phone number or Email
- Role (Dropdown: Admin / Manager / Staff / Decorator)
- Password or OTP method
- Status: Active / Inactive

Actions:

- Submit → Save user
- Send credentials or OTP to user
